SUMMARY

Motivated and technically skilled high school student with over a year of customer service experience and strong proficiency in programming. Seeking an opportunity that leverages both communication and skills in retail, and if possible tech or IT, or customer-facing technical role.

Technical Skills:

Languages: C#, C++, Java, Lua, Python, JavaScript, HTML

Frameworks & Tools: .NET MAUI, WPF, Uno, LiveCharts, Azure AI, HTML Agility Pack

Technologies: Full-Stack Development, Mobile App Development, JSON API Integration

Platforms: Visual Studio, GitHub, Windows, LinkedIn Learning, Unreal Engine, Roblox, Unity

Soft Skills:

- Cashiering & Register Operation
- Verbal & Written Communication
- Bagging & Inventory Restocking
- Team Collaboration

Awards: Congressional App Challenge, chosen out of hundreds of students nationwide for leveraging an innovative solution to government problems with a programming language and software.

Projects:

- ★ Developed Ecosense, a multi-version mobile app for identifying animal species and tracking water quality across the U.S.
 - ★ Integrated YOLOv11, Azure AI, and real-time data from USGS and EPA databases.
 - ★ Designed structured JSON storage for location, species, and water statistics.
 - ★ Contributed to both backend logic and image recognition infrastructure
-

EDUCATION

CHELMSFORD HIGH SCHOOL

GPA: 4.03; Class Rank: N/A

Notable Classes: AP Computer Science A, AP Physics 1, AP U.S. History, AP Statistics

Senior Year: AP AB Calculus, AP Environmental Science, AP Psychology, AP Physics C: E&M, AP Physics C:

Mechanics, AP African American Studies, AP Computer Science Principles

EXPERIENCE

EMERSON HOSPITAL

08/2023 - 09/2025

Boston, MA

Transport Volunteer Work

- Volunteered in a hospital where we were responsible for moving patients from surgery to different facilities as well as transporting biohazardous items from lab to lab.

MIT LL BEAVER WORKS SUMMER INSTITUTE

07/2025 - 09/2025

Remote Sensing

Virtual

- Was given the opportunity to explore the intersection of data science and disaster response through python programming. In the end we simulated a disaster event and programmed satellite sensors to capture and analyze the events and stats of a real life hurricane.

MARKET BASKET

08/2023 - 08/2024

Cashier

Chelmsford, MA

- Delivered prompt and friendly service to customers in high-paced environments.
- Operated POS systems efficiently as cashier.
- Maintained clear communication with team members and management.
- Enhanced interpersonal skills while assisting diverse customers.

McDONALDS

07/2024 - 06/2025

Crew Member

Chelmsford, MA

- Took and prepared orders with accuracy and speed.
- Worked flexible shifts and remained dependable under pressure.
- Practiced sanitation standards and supported back-of-house efficiency.
- Strengthened multitasking, customer conflict resolution, and team collaboration.
- Learned to make different drinks and prepare meals for customers.
